Sensibo Airbend

Smart HVAC Management for Businesses

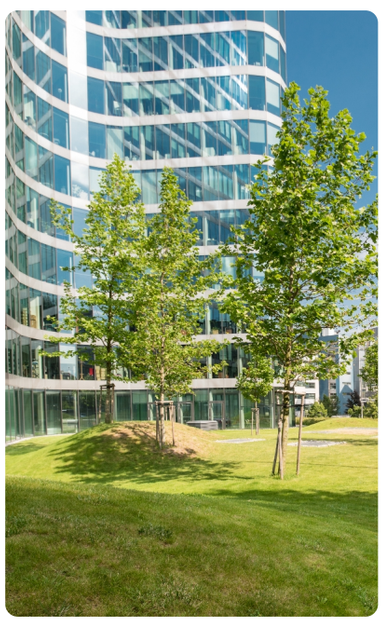

Businesses spend 40% of their energy consumption on heating and cooling. Sensibo offers a unified platform that allows businesses to **manage all their devices from one centralized dashboard**, reducing emissions and saving money in the process. Sensibo Airbend is perfect for businesses, including:

Schools | Hotels | Property managers | Offices

Why Airbend?

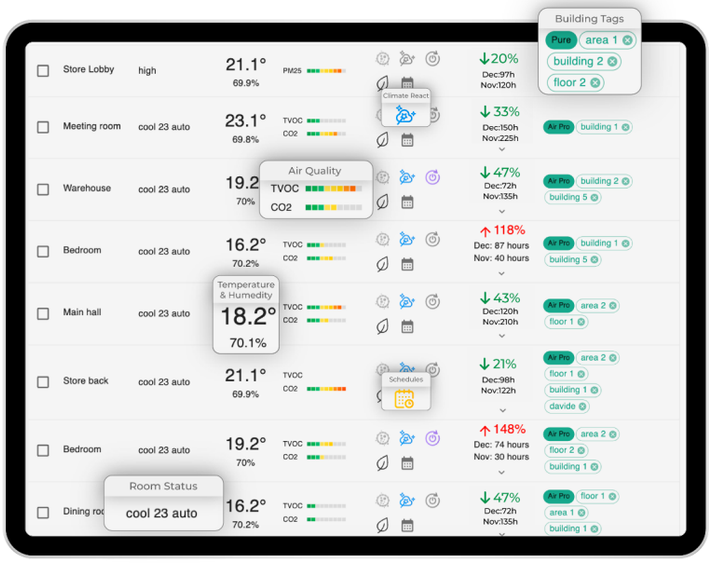

Airbend gathers valuable insights about your building's energy usage, helping you identify areas where you can make efficiency improvements, saving you money on your energy bills. Help your business **go green and slash Co2 emissions**, meeting your environmental goals while saving time and energy.

Next-Gen AC Management

Using our AI-powered **smart AC algorithms**, we empower businesses to easily control, schedule, and manage all of their devices from one platform with a unified dashboard. Gone are the days of AC units left on unnecessarily and ever-increasing energy bills.

How it Works

Airbend is easy to install and use, and it's compatible with a wide range of devices, including air conditioning units, heat pumps, and air quality monitors. With Airbend, **customize temperature and humidity levels for each room**, monitor energy usage in real-time, and set schedules to save energy when it's not needed. Or, use Airbend's bulk actions to change the state of every connected AC.

Take control of your building's energy usage today with Sensibo Airbend!
